## RESPUESTAS

Possible answer

The iMac is a desktop computer with an Intel Core 2 Duo processor which runs at 2.33 gigahertz. The iMac has two gigabytes of RAM, which can be expanded up to three gigabytes. The hard disk can hold 500 gigabytes. It is suitable for home users and small offices. It comes with a DVD SuperDrive that lets you burn all types of DVDs and it features a camera built right into the display so you can start a video chat instantly. The iMac comes with the latest version of Mac OS pre-installed which includes internet software and some programs to organize and edit your photos, music and movies
